SUMMARY

Full-Stack web developer with a background in the arts - imagining the impossible, executing high-caliber material on a deadline, bridging the human experience with technology. Recent graduate from the University of Washington with a certificate in Full-Stack development, focusing on mobile first technologies. Exceedingly malleable and a quick study to learn your desired languages and programs. Recognized as a collaborative problem solver with excellent communication, design, and customer service skills.

TECHNICAL SKILLS

Languages: React.js, JavaScript, ES6, JQuery, HTML5, CSS, Express.js, Node.js, SQL, MySQL, MongoDB

Tools: Git, GitHub, Heroku, AJAX, JSON, REST API, Handlebars, Bootstrap

PROJECTS

WineKey | http://fv-winekey.herokuapp.com **|** https://github.com/wolfdog27/Wine-Key

- Commissioned by Fire&Vine Hospitality, Wine Key is a wine inventory/trading application.
- Back-End Developer: implemented bcrypt for basic security log-in page, Sequelize and Express to create functional CRUD wine inventory tables for each restaurant, and complete searchable master wine list.
- HTML5, CSS, JavaScript, Node, Express, Sequelize, Handlebars, jQuery, ZURB Foundation

Pawsitivity | https://pawsitivity-atack.herokuapp.com **|** https://github.com/wolfdog27/pawsitivity-front-end

- Pawsitivity is a React pet adoption application connecting users and animal shelters. Users can swipe for a local (filtered) cats or dogs, while shelters can update their list of adoptable pets and connect with users.
- Front-End Developer: designed UI/UX with Ant Design, implemented Google Maps from PetFinder information via Geocode, created modals with animal information with props and state.
- React.js, HTML5, CSS, JavaScript, Node, MySQL, axios, API

EXPERIENCE

Broadway National Tour: *Something Rotten! 2016-2018*
